### School Overview Presentation

Miller Creek strives to create a learning community that allows every student to engage and thrive. To support school connectedness, Miller Creek, through the support of Can Do!, offers rich opportunities outside of the classroom so that every student can build the necessary social/emotional skills that support academic success.

### Academic Updates

Providing a rigorous academic experience is a top priority at Miller Creek. Teachers work in collaborative teams to design a program that both challenges and supports students in achieving excellence. A school-wide academic update will be provided including performance on statewide assessments and recent curricular pilot information.

### Presentation on Social/Emotional Learning

The Miller Creek staff is working on developing a deeper cultural proficiency in an effort to support every student and family. This learning translates to students through classroom curricular updates, extended homeroom and counselor-led lessons and opportunities in organizations and clubs that celebrate diversity and promote acceptance. Students will present ways in which their clubs and leadership organizations support social/emotional learning and our counselors will share a roadmap that shows how students and families are supported during their three years at Miller Creek.

The video presentation will highlight these diverse programs and provide a window into the daily life at Miller Creek.
